Pair the Smart In-Wall Outlet.

1

Download the **Energizer**_® Connect app from the App Store (for iPhones) or Google Play Store (for Android phones).

Before opening the app, make sure your phone is connected to the WiFi network that your Smart In-Wall Outlet will be placed on.

Open the app and create an account by following the on-screen instructions.

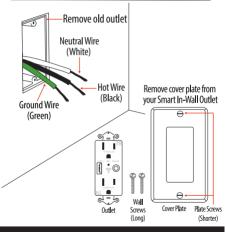

Before installing your Smart-In Wall Outlet, locate your power breaker and shut it off before removing the old outlet.

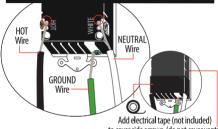

Note: The Smart In-Wall Outlet is not suitable for appliances that require more than 15 amps. Please check the device's electrical requirements before plugging in.

Loosen the 2 screws on the sides of your Smart In-Wall Outlet. Take your HOT wire and push it all the way into the opening adjacent to the copper screw. Then take the NEUTRAL wire and push it all the way into the opening adjacent to the silver screw. Tighten all screws securely to crimp the wires inside the Smart In-Wall Outlet. Connect your ground wire to the green screw on the bottom of the Smart In-Wall Outlet.

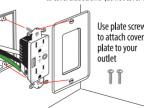

to cover side screws (do not cover vents)

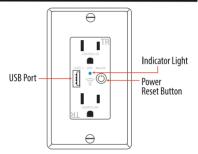

Use plate screws

plate to your

Once securely connected, push wires back into the wall carefully and attach outlet to vour outlet box using the long screws provided

Once installation of your Smart-In Wall Outlet is complete turn the breaker back on. After the Smart In-Wall Outlet powers up, the indicator light on the front will start blinking. Confirm the status using the chart below.

Note: The indicator light on the outlet should start blinking rapidly (about 4 times per second) for EZ pairing mode.

EZ MODE	Rapidly blinking (about 4 times per second)
AP MODE	Slowly blinking (about 2 times per second)

After logging in, click "+" on the top right of the screen and select "Add Device".

Select "Plug".

Confirm that the indicator light is rapidly blinking, then click "Next."

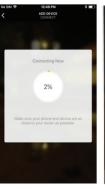

Confirm that the network WiFi displayed is your **2.4ghz WiFi** network, enter your WiFi password and click "Confirm."

Your Smart In-Wall Outlet will now be connected to the network. Confirm the settings for your device and then click "Finish Device Setup."

Your **Energizer**_® Smart In-Wall Outlet is now ready to use. You can now set schedules, timers and control your Smart In-Wall Outlet remotely.

We hope you enjoy using your *Energizer*_® Smart In-Wall Outlet. For frequently asked questions and instruction videos, please visit our website at www.energizerconnect.com.

To enable voice access for your Smart In-Wall Outlet, you will need to link the **Energizer**_® Connect skill with your choice of voice assistant.

Voice Activation for AlexaMake sure your Alexa device is installed and set up first.

- 1 Open your Alexa app.
- Open the menu to search for Skills.

Search for & choose Energizer_® Connect.

- 4 Authorize your account with the Alexa skill using the username and password from your Energizer_® Connect app.
- Using the name you assigned your outlet, you can ask Alexa to turn on/off your appliances. Ex: "Alexa, turn on bedroom outlet."

Voice Activation for the Google Assistant Make sure your Google Assistant device is installed and set up first.

- Open your Google Home app.
 - Click the "+" to add a new device 3 Click "Set up device"

4 Click"Have something already set up?" 5 Search for & choose New Merrices Energizer Connect.

- Authorize your account with the Google Assistant skill using the username and password from your *Energizer* Connect app.
- Using the name you assigned your outlet, you can ask the Google Assistant to turn on/off your appliances. Ex: "Ok Google, turn on bedroom outlet."

Troubleshooting

If you need to reset or troubleshoot your Smart In-Wall Outlet, simply hold down the power/reset button for 5-10 seconds.

Pairing Modes:

EZ mode: The device's light is rapidly blinking for easy, quick pairing setup.

AP Mode: Access Point mode is a secondary setup process in which the device's indicator light is slowly blinking and requires multiple steps for pairing. Follow the on-screen step by step instructions.

FCC Compliance

This device complies with Part 15 of the FCC. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the enuiroment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- —Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- —Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Statement

To satisfy FCCs RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of this device and persons during device operation. To ensure compliance, operations at closer than this distance is not recommended.
